### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On the first page of the specification, the phrase --now U.S. Patent No. 6,863,127,-- has been inserted after "June 3, 2003," in line 7 and the phrase --, now U.S. Patent No. 6,614,229-- has been inserted after "2000" in line 8.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: As for claims 1-12, no prior art discloses or renders obvious a casing drilling system for monitoring a characteristic of a reservoir surrounding a borehole as claimed and wherein the casing tubular has a casing drilling assembly coupled to its lower end and includes at least one station having at least one slot formed therein, and at least one antenna or sensor is disposed within the casing tubular and positioned such that the antenna or sensor is aligned with the at least one slotted station. As for claims 13-24, no prior art discloses or renders obvious a method for monitoring during a drilling-with-casing operation a characteristic of a reservoir surrounding a borehole as claimed and wherein the casing tubular is provided with at least one station having at least one slot (or opening) formed therein and a casing drilling apparatus locked to its lower end; and an antenna is

disposed within the casing tubular and positioned such that the antenna is aligned with the at least one slotted station (or opening).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Drawings*

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because: (1) in figure 29, parts shown in section (i.e., casing tubular 925) are not properly crosshatched and lines, letters and numbers are not uniformly thick and well defined, clean, durable, and black; and (2) Figure 38 (last figure in the drawings) is not labeled as such. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 571-272-7028. The examiner can normally be reached on 9:15-5:45 Monday-Friday.
